AUSTRALIA: Woodside Burrup Pty Ltd. has awarded an engineering, procurement and construction management contract to a joint venture led by a subsidiary of Foster Wheeler's Global Engineering and Construction Group for the onshore portion of Woodside's Pluto liquefied natural gas (LNG) project in Western Australia.

The contract value was not disclosed. Foster Wheeler's joint venture partner is WorleyParsons Services Pty Ltd.

Scope of work under the contract includes a single LNG production train with forecast production of 4.3 million tonnes/year (4.7 million tons/year) of LNG, a fractionation unit, an acid gas recovery unit, gas purification units, tankage storage facilities, a boil-off gas compressor, loading berths, gas turbine power generation units and utilities.

LNG production is scheduled to begin at the end of 2010
