

## Zone support for Inpex

The WA Local Government Association Kimberley Country Zone has thrown its weight behind the push for Inpex to set up a gas processing plant on the Maret Islands.

However, the support comes with some conditions.

Kimberley Country Zone president Graeme Campbell said the decision was made at the recent zone meeting.

“The Kimberley Country Zone supports Inpex for the proposed development of the Maret Islands gas project, providing all environmental clearances be approved by the State Government,” Mr Campbell said.

The Country Zone member councils include the Shires of Broome, Derby-West Kimberley, Halls Creek and Wyndham-East Kimberley.
